Full cloud solution

One platform for all GoBright solutions. On-premise installation also available!

Visit www.gobright.com/meet for more features

Expand your **room booking** solution with these powerful **additions**

ADDITIONS

Catering & Services

Book catering and other services within the same platform

With GoBright Catering & Services it is possible to book all peripheral needs before, during and after the meeting within the same platform as Room Booking. So, you no longer have to work with different software systems. For example, if the time or date of a meeting changes, the catering & services order will also change automatically. This prevents making mistakes.

Control

View the remaining time of the meeting and control the presentation display

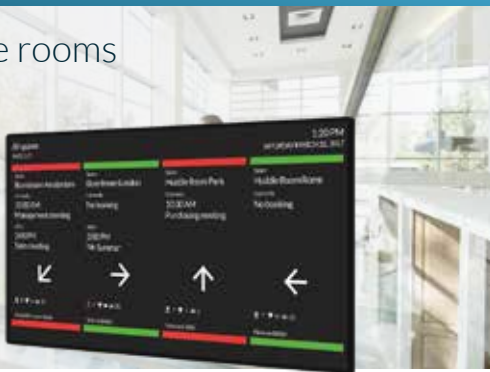

Time flies, even during meetings. Suddenly the next users are in the meeting room to start using it. Recognisable? GoBright Control shows at a glance how long the meeting room has been booked for you, so that you can finish the meeting on time or extend your reservation. GoBright Control also gives you the opportunity to control some basic functions of the room's presentation display.

Wayfinding

Show first coming meetings and visitors the shortest way to the rooms

GoBright Wayfinding shows the actual occupation of all rooms in one overview. It also visualises in which direction the meeting rooms are located and which upcoming meetings are planned. So customers, guests and, visitors quickly find their way throughout the building.

Detection

Use detection for more reliable analysis data to realise most efficient use of all rooms

With GoBright Room Detection a smart sensor detects movements. When someone uses a room without having it booked, the occupancy will be nevertheless measured. This also happens if someone leaves the room without checking out. This is making the registration more accurate and the analysis data more reliable. So facility management is able to make the right interpretations of the use of assets.

Three **smart** concepts One **user-friendly** platform

More and more organisations are accepting new styles of working and this is changing the function of offices. Employees want to work together and meet guests instead of only just coming to work. But creating more meeting rooms and fewer workplaces is not enough. Day-to-day reality is: searches for a room or workplace, disruptions during a meeting or while working, untraceable colleagues and visitors who have to wait at the reception. This ensures reduced productivity.

Today employees want to organise a meeting independently, reserve a room or workplace directly and send invitations easily. They want the optimal availability of flexible workplaces and dislike claiming desks. Their guests don't have to wait too long and must be at their destination quickly.

GoBright meets these needs. We are creating availability and support employees with three accessible concepts for Meet, Work and Visit Management. So that they are able to do their work smartly, pleasantly and efficiently. We are giving organisations the opportunity to develop new ways of working and save costs and energy. Because, if employees can create availability very easily, they will use these solutions automatically.

**Technology makes it possible,
GoBright makes it available**

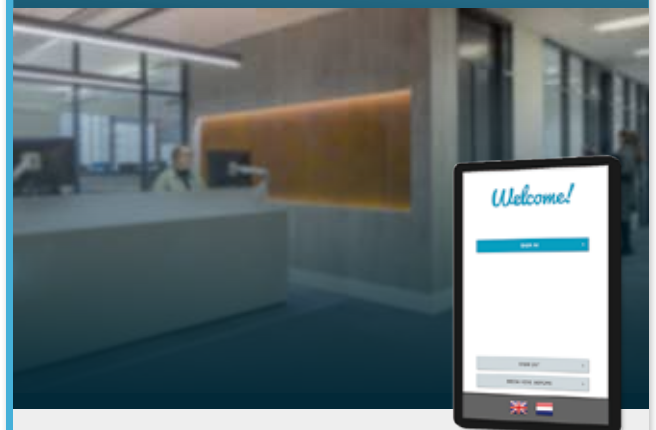

Also meet our **work** & **visit** concept
