GoBright Connect
Product information

The GoBright Connect is a unique – patented – piece of hardware that GoBright has developed itself, at any desk. With the Connect you control your desk and create your own personal space. The Connect has a glass top with LED lighting and is water-resistant. The Connect is a must-have in flexible office environments where hybrid working, activity-based working or hot desking are the norm.

Required accessories

License
Desk manager license per desk

Gateway
Multi gateway Mesh to GoBright platform

Connection cable
Connection cable Linak or USB powered

Optional accessories

Sensor
For reliable analysis data to realise most efficient use of all desks

Glow
For extra visibility on partition walls and monitors

Caddy
Place the Connect on top of a desk, instead of building it in

Features

Ad hoc desk booking
Is a desk available? Simply make it yours by scanning the Connect with NFC / RFID card or use the GoBright Mobile App. Ideal in hybrid and hot desking environments.

Checking in/out
Did you book a desk in advance? Check in by scanning the Connect so the entire GoBright platform knows the desk is occupied. And, once you've finished your work, check out via the Connect to free up the desk again.

Desk occupation data
Desk occupation data is collected and can be used to set up the office as efficiently as possible.

Personal settings
Pre-set your personal sitting / standing height. One click on the Connect makes your desk change its height automatically. It is a follow-me system; every desk that you log into will take over your pre-sets. Switching between sitting and standing work is very important for your health. The Connect contributes to a healthy workplace.
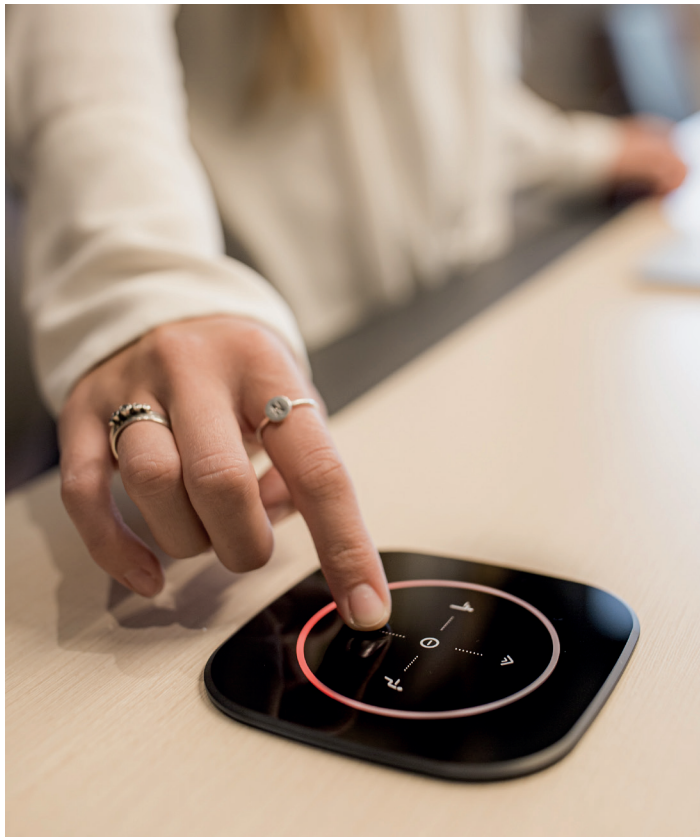

"Find my desk"
Use it in the App and the Connect starts flashing to indicate which desk is yours. Once checked in at a desk your colleagues know where to find you using the 'Find my colleague' function.

Desk Status

The LED ring shows the status of a desk:

Green   The desk is free and bookable.

Red   The desk is occupied and non-bookable.

Blue   The desk is occupied and non-bookable and the person at the desk does not want to be disturbed.

Purple   The desk needs cleaning.

Hygienic Desk

The color Purple indicates that a desk needs to be cleaned before it can be used again. This way the facility manager can make decisions more effectively regarding the cleaning schedules.

GoBright Caddy

We have developed this additional product especially for the Connect. When using the Caddy it is not necessary to make a hole in the desktop, assembly is a lot faster (especially in offices with hundreds of desks), making it even easier and more flexible to use the Connect.

From front to back, the Caddy rises slightly diagonally, in height. So the Connect is placed at an angle in the Caddy. As a result, the occupancy status of the desks is even better visible from a distance than when the Connect lies flat in the desk.

Functions

|	
LED ring	Free (green), Occupied (red), Do not disturb (blue)
Sitting button	Go to personal sitting height
Standing button	Go to personal standing height
Up button	Desk goes up
Down button	Desk goes down
