

# GOBRIGHT VIEW

**GoBright View is a digital signage tool that allows a user to easily create and play content on different screens, in different time periods. Basically it contains all the functionalities that you may expect from digital signage software. But, GoBright View has even more features that are certainly worth viewing.**

## Custom Widgets

Use the standard widgets which are always available. Or .... Program your own widgets and connect with, for example, Sharepoint, Power BI and scheduling tools. (Knowledge of HTML, CSS or JavaScript is required).

## Tagging

Assign multiple tags to your screens.

Apply tags on your playlists so that this content only plays on the tagged screens.

Tagging allows embedding / excluding screens from the content planning.

## Zones and Channels

Various content can be shown on the same screen, at the same time, in different Zones

Create multiple Channels and switch between Channels with touch interaction.

## Responsive Templates

- Create content that adapts itself
- Can be displayed in any resolution
- Supports different orientations

## Future Developments

Picture in Picture

Touch functionality

Priority Break

Single Sign On

## GoBright Platform

View is part of the GoBright Platform. As a result, the data from our software can be used within View. This reinforces the Smart Office principle, which optimizes working conditions and makes collaboration more efficient.

## And, finally...

Supported by WebOS 3.2 or above and compatible with the WebOS Box, including RS-232 support.

ISO 27001 8: ISO 9002 certified.

Cloud based; easy installation, data protection secured.

Updates, upgrades, security and maintenance included.

# WORTH VIEWING

Welcome to the  
3rd Floor
