The GoBright Interact is a versatile and interactive hardware device developed by GoBright that can be used for both Room Booking and Desk Booking. It allows the user to create detailed bookings and view existing bookings. The GoBright Interact has a 3.46" LCD capacitive touch panel and a LED light to share visual information of the status of the resource.

FEATURES AND BENEFITS

Ad hoc Desk Booking
Is a room/desk available? Book the space. In combination with Microsoft Teams Rooms for Room Booking.

Checking In/Out
Did you book a room/desk in advance? Check in by scanning the Interact so the entire GoBright platform knows the room/desk is occupied.

Booking Information
Visbility is created with the display. See booking information and upcoming meetings.

Personal Settings (with Desk Booking)
Pre-set your personal sitting/standing height. One click makes your desk change height automatically. This way the Interact contributes to a healthy workplace.

WiFi Connection
The Interact is indispensible in flexible and hybrid work environments. It works on WiFi and thus can be installed in no-time.

ROOM/DESK STATUS

The LED ring shows the status of a room/desk:

🟢   The room/desk is free and bookable.

🟡   The room/desk is reserved and check-in is needed.

🔴   The room/desk is occupied and non-bookable.

🔵   The desk is occupied, non-bookable, and the booker does not want to be disturbed.

🟣   The desk needs cleaning.

Mounting Options
The Interact can be mounted underneath or on top of a desk, on a partition wall, or on meeting room walls. Thanks to its compact design, the Interact is also perfect to attach to silence pods, office cabins, or other workspaces.

SPECIFICS

Article Number
INT1   GoBright Interact - 5 pack (one package contains 5 units)

Accessories
INT1-ADAPT-MULTI   Power Adapter for Interact Device (EU/UK/US Plug)
PWR-CABLE-USB-C   USB-C to DC jack Power Cable
