DESK STATUS

The LED ring shows the status of a desk both with the GoBright Interact and Connect:

- 🟢 The desk is free and bookable.

- 🟡 The room/desk is reserved and check-in is needed.

- 🔴 The desk is occupied and non-bookable.

- 🔵 The desk is occupied, non-bookable, and the person at the desk does not want to be disturbed.

- 🟣 The desk needs cleaning.

Hygienic Desk
The colour purple indicates that a desk needs to be cleaned before it can be used again. This way, the facility manager can make more efficient decisions regarding cleaning schedules.

GOBRIGHT GLOW

The Glow improves overall visibility of desk occupation statuses throughout the office.

- ✅ Its LED-colour indicates the desk's availability;

- ✅ Compatible with both the Interact and Connect;

- ✅ Easily locate your booked desk with the 'Find my Desk' feature in the GoBright App;

- ✅ It subtly improves visibility of desk availability at the office.

SENSORS

GoBright offers two types of sensors: Room Sensors and Desk Sensors.

- ✅ Detects if spaces are being used when they are not booked in advance;

- ✅ Identifies areas that were booked but are not being used, freeing them up for others;

- ✅ Four Desk Sensor options: Battery powered rf, Connect-paired, Internal sensor Interact and External sensor for Interact;

- ✅ The Room Sensor, RFROS1 Sensor, works on radiofrequency, it does not need Wi-Fi or a PoE-connection.
