# BEHAVIOUR DASHBOARD

## The newest addition to GoBright Advanced Analytics

Every workplace generates data. The real value lies in understanding behaviour and turning it into data driven decisions.

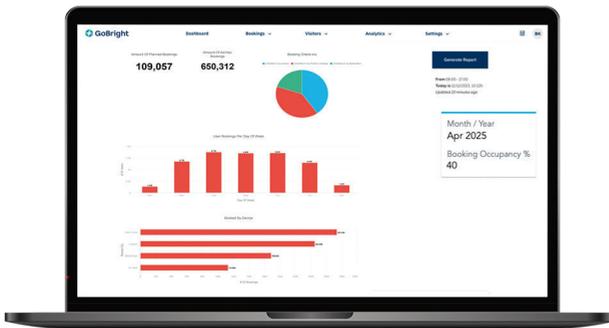

Without clear insights, organisations manage workplaces based on assumptions. This leads to underused spaces, inefficient layouts and avoidable costs.

Smarter Decisions with Behaviour Analytics.

The Behaviour Dashboard and analytics tools transform workplace data into actionable insights. Using AI-driven forecasting, it predicts occupancy for desks, rooms and parking to support strategic decisions like consolidating floors, while real-time analytics reveal department occupancy, system usage and actual team attendance, helping organisations optimise the workplace and boost ROI.

**GoBright proudly introduced our new Behaviour Dashboard the newest addition to GoBright Advanced Analytics.**
